

Child Care in Pend Oreille County

October 2010

Child Care Resource & Referral Across Washington State

These state and county profiles are compiled by the Washington State Child Care Resource & Referral Network (CCR&R Network) in partnership with the Washington State Department of Early Learning.

Established by state statute in 1989, the CCR&R Network connects families seeking child care with licensed providers; supports child care providers by enhancing the quality of their care and small businesses; leverages resources in order to increase the availability and affordability of quality child care; and informs policy makers using data collected statewide in local communities.

During 2009, the CCR&R Network's 11 member agencies:

- Handled 90,908 calls;
- Processed 19,806 public referral calls;
- Served 17,908 families and 25,425 children; and
- Assisted 10,190 low-income families find child care.

Child Care Resource & Referral Supports Communities by:

- Helping parents find quality child care for their children;
- Sharing parenting and child development information with families who seek it;
- Providing training to providers so their care is high quality and their businesses are strong;
- Collaborating with local partners to ensure that child care is available and affordable in every community; and
- Advocating for effective public policies that support families and child care providers.

Child Care Resource & Referral In Pend Oreille County

Family Care Resources hosts the child care resource and referral (CCR&R) program serving Pend Oreille County. In 2009, staff responded to 7,130 calls in the region from parents, providers and community members seeking information and assistance navigating the child care system. CCR&R staff and consultants are also out in the field: conducting training, collaborating with community partners, and reaching out to families across income levels, geographic barriers, and ethnic identities to provide them with vital child care consumer education.

Notable highlights of this report:

- Since 2005, the total number of licensed child care facilities has fluctuated slightly, resulting in no net change; however, the number of potential licensed child care slots has more than doubled (from 69 to 148), all from gains in center facilities.
- Infant care continues to be the most difficult care to find and the most expensive, with median annual costs from \$5,824 to \$6,500.
- For a family with an infant and a preschooler in full-time care, the median cost of child care represents 32% to 33% of the county's 2009 median household income.

Kids Count, WA Dept of Early Learning, WA Dept of Social & Health Services, WA Employment Security Department, WA Head Start State Collaboration Office, WA Office of Financial Management, WA Office of Superintendent of Public Instruction, US Census Bureau, US Federal Registry, Washington Guarantee Education Tuition, and the Washington State Child Care Resource & Referral Network.

Licensed Child Care in Our Community

How many providers are there in my area by type?

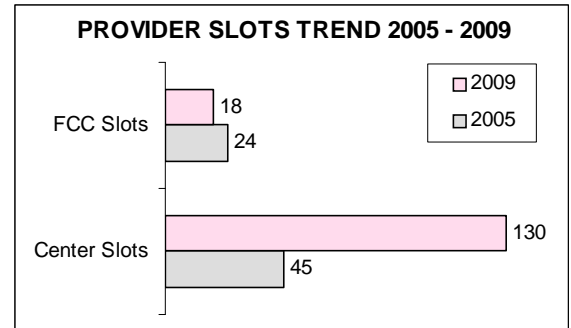

Family child care (FCC) businesses account for two of the four licensed facilities in Pend Oreille County. In the past five years, the number of licensed facilities has fluctuated up and down, with no net change.

Since 2005, the number of family child care businesses started at 2 and fluctuated up and down, but ended at 2 in 2009. Similarly, the number of centers also varied up and down between 2 and 3 facilities, beginning and ending at 2.

How has the number of child care slots changed over the last five years?

In the past five years, the county has experienced a 25% decrease in the number of potential family child care slots (with the loss of 6 slots). In that same time, the number of potential center-based slots nearly tripled, going from 45 to 130. Overall, in 2009 there were 79 more potential licensed child care slots than in 2005 (a 115% gain), all in center facilities.

What is the distribution of slots by type of care and by age?

Because of a higher required ratio of adults to children under 2 years old in licensed care, there are fewer slots for infants and toddlers than for other age groups. In centers, the ratio is highest (1 adult to 4 infants) and the potential number of infants is lowest, making family child care a critical option for working parents of our youngest children.

Note: This chart does not represent actual enrollment of children in care. The number of slots for all children is overstated in this comparison. It shows each age group filled as if there were no other children in the other age groups. If a slot is filled for one age group it cancels out the potential slot for the other age groups.

What languages are spoken?

All providers report speaking English, and one provider reports speaking an additional language.

Languages Spoken by Providers	
English	100%
Other	25%

How much non-standard care is available in my community?

Nearly all providers offer full- and part-time care during weekdays only. Only one regularly offers care during non-standard hours—on evenings past 6:30 PM. No providers regularly offer overnight or weekend care.

Economics of Child Care Providers**What do child care providers earn compared to kindergarten teachers?**

2010 Average Salary Comparisons: Kindergarten Teachers and Child Care Providers			
Public School Kindergarten Teacher	Director Child Care Center	Teacher Child Care Center	Family Child Care Provider Business Gross Income
\$48,483/yr \$4,040/mo	\$30,516/yr \$2,543/mo	\$23,496/yr \$1,958/mo	\$30,535/yr \$2,545/mo

Washington's kindergarten teachers earn 59% more than center directors, more than double what child care teachers earn, and 59% more than family child care providers' gross earnings in the region. The substantial wage differential can be attributed to higher educational requirements for kindergarten teachers and relatively low turnover in public schools. The lack of competitive wages makes it difficult to recruit and retain educated child care workers and can have a negative impact on the quality of care.

How does the child care subsidy reimbursement rate affect provider profitability?

Current state child care subsidy reimbursement rates are one constraint on wages, quality, and financial solvency for providers.

2009 Ranges: Monthly Full-Time Subsidy Reimbursement Rates				
	Infant	Toddler	Preschool	School-Age
Centers	\$618	\$520	\$491	\$462
Family Child Care Homes	\$526	\$458	\$458	\$407

To support the average salary of a teacher, aide and part of the cost of the director for an infant classroom in a center (based upon 2010 salary rates), a program would need to enroll at least **6.8** of the licensed maximum of 8 subsidized full-time infants. Income generated from the other **1.2** infants would have to cover all other classroom costs including benefits, training, rent and supplies.

In a typical family child care home, one provider might have two infants and four preschoolers. A provider's gross earnings if all the children are on subsidy would be **\$2,883** per month. Out of these earnings, the provider must pay all expenses, including salaries, benefits, taxes, rent, meals, training, equipment and supplies.

Quality Initiatives**CCR&R Training & Education**

The CCR&R Network provides state-mandated training for providers. In 2009, this CCR&R offered **85 trainings** for the workforce in the region.

Washington Scholarships for Child Care Professionals is a scholarship program that provides financial support for centers and school age staff and family child care providers to obtain higher education degrees and credentials in early childhood education. In 2010, **1 scholarship** was awarded in this county.

Quality Rating in Communities

Seeds to Success is the voluntary quality rating and improvement system for licensed child care being piloted in Washington. The Washington State Department of Early Learning and Thrive by Five Washington are partnering to test the Seeds to Success standards with the help of **93** voluntary facilities in White Center (King County), East Yakima and in Spokane, Kitsap and Clark counties. In fall 2010, Seeds sites received a baseline rating:

Environment Rating Scales (ERS) - Scale of 1 (Inadequate) to 7 (Excellent)

Early Childhood	4.29
Infant/Toddler	3.84
Family Child Care	3.92
Overall Average	Centers: 4.01
	FCC: 3.91

The **3.82** to **4.25** score range on the ERS indicates "minimum to better than custodial care".

Classroom Assessment Scoring System (CLASS)-Scale of 1 (low) to 7 (high)

	Centers	FCC
Emotional Support	5.12	5.82
Classroom Organization	4.58	5.22
Instructional Support	3.35	3.05

CLASS measures teacher/child interaction. CLASS scores are in the mid-range.

Seeds to Success Quality Standard Areas Scale of 1 (low) to 5 (high)

	Centers	FCC
Overall Average	1.08	1.00

The baseline data shows that children are cared for in facilities with warm and responsive providers. The overall **1** to **1.08** average rating also indicates the need for **quality improvement investments that ensure children receive high quality early learning opportunities that promote ready and successful children.**

In spring 2011, programs will receive a second rating after receiving targeted coaching and professional development. In late 2011, DEL will adopt the final seeds model and expand statewide, depending on funding availability.

About the Families

Families who access CCR&R services are regularly surveyed by the CCR&R Network in order to enhance our services and inform policymakers. Parents report that they contact their local CCR&Rs for:

- A list of providers (90%)
- Information on child care options (54%)
- Child care payment options (5%)
- Education about what quality childcare looks like (2%)
- Details on child care rules and regulations (2%)

Parents surveyed indicated that CCR&R services helped them understand:

- The steps to take to find childcare (68%)
- What their family needs from a childcare provider (56%)
- The importance of quality child care for their child's development and growth (51%)
- What a quality childcare provider looks like (49%)

85% of parents surveyed reported that they found child care as a result of contacting their local child care resource and referral.

"This is the greatest site and service. Every new parent should learn about this, even if they think they won't need it. Thank you."

— Anonymous Parent, 2010 Survey

Affordability for Families

How much does child care cost in my community?

Countywide, the annual median household income in 2009 was **\$34,931**. The tables below indicate the annual median price of full-time care for one child by age group and type of care. The median price indicates that half the providers in the area charge more and half charge less than the prices quoted here.

Centers	2009 Median Annual Cost for 1 Child	% of 2009 Med. Household Inc.
Infant	\$6,500	19%
Toddler	\$5,495	16%
Preschool	\$5,001	14%
School Age	\$3,606	10%
Family Child Care	2009 Median Annual Cost for 1 Child	% of 2009 Med. Household Inc.
Infant	\$5,824	17%
Toddler	\$5,824	17%
Preschool	\$5,252	15%
School Age	\$2,340	7%
Four-year Public University	2009 Annual Cost for 1 Student	% of 2009 Med. Household Inc.
Student at WSU	\$11,700	33%

While the median cost of family child care can be up to 12% less than the cost of care in a center, child care continues to represent a substantial expense for families. The cost of full-time care for an infant represents 17% to 19% of the county's 2009 median household income. Care for an infant and a preschool child would represent 32% to 33% of the median income, which is equivalent to the cost of tuition for one at a 4-year public university.

Families Using CCR&R Services

Who are the families that call the CCR&R Line?

In 2009, **3** families received referrals. Two of the families served were low income. All were headed by a single parent.

There were no requests for referrals to licensed facilities offering non-standard hour care.

What ages of children are referred?

Among the three children referred for care, one was a toddler, and two were preschool-age.
